DRAWING NAME: VALVE HOUSE - COVER PAGE & ELEVATION VIEWS

DRAWING #: S1

SCALE: 1/2" = 1'-0"
GENERAL NOTES:

- Customer is responsible for anchoring the building to the foundation, see DWG. S5
- Building dimension "A" can range from 5'-0" to 20'-0"
- Building dimension "B" can range from 5'-0" to 30'-0"
- Building dimension "C" will always be determined by the wall in which the door is located in
- Standard floor to ceiling height inside building is 7'-0" if more is required please specify.
- The door can be installed in any of the four (4) walls and that wall shall be a min. of 6'-0" wide
- For shipping purposes, dimension "C" or "D" cannot exceed 6'-0" for one on the other.
- Please specify "Single Sided" or "Double Sided" for the door swing direction.
- Actual door location may shift vary 6" one way or the other from center of slab if location shown is for this project the customer has specified the following:

FRONT WALL & RIGHT SIDEWALL - 3D VIEW

BACK WALL & LEFT SIDEWALL - 3D VIEW

EXCLUSIONS:

1. Design and construction of concrete slab
2. Design and building of concrete slab
3. Building walls and ceiling are metal but are not fire rated.
4. If this is a requirement, consideration should be given to provide exterior relief water spray to the building walls and roof.
5. Electrical supply to the valve house
6. Any fire alarm system, panel, conduit, devices, etc.
7. Any space ports for the building
8. Any fire extinguisher required to be inside the building

BUILDING COLORS:

- Color of exterior roof overhang: "BRIGHT WHITE"
- Color of extension corner trim: "WHITE"
- Color of interior walls & ceiling: "WHITE" and other color is available.
